

Wood

ABOUT WOOD

100% of the timber used in Maark products is from certified sustainable sources with FSC® accreditation and PEFC™. Maark's craftsmen always use reclaimed or sustainably sourced materials. They apply a premium hard wax oil which is made of natural vegetable oils and waxes, keeping it extremely tough and hard-wearing. It is water-repellent and dirt-resistant and an ideal treatment even in rooms with high humidity.

Wood is a natural product which behaves differently across various environmental conditions. We recommend avoiding extreme variation in temperature and humidity. It is possible to notice differences between the samples and the various items. These differences should not be considered imperfections, but instead are signs of quality.

EVERYDAY CLEANING + MAINTENANCE

Cleaning Procedure

Regularly wipe timber with warm water using a soft detergent free sponge or cloth.

No Chemicals

Avoid alcohol-based or solvent-based detergents as this may damage the surface and leave a rough and dull appearance.

No Scourers

To avoid unsightly scratches, do not use abrasive cloths, chemicals or powdered cleaners that could damage the surface. Use damp cotton cloth to remove dirt, dust, or other impurities. Gentle circular movements without rubbing is recommended. Immediately dry with a fresh cloth to remove residual moisture and prevent streaking.

Avoid Prolonged Moisture

Avoid leaving moist or wet products directly on the wood for an extended period. This includes soap dispensers. Timber should be dried after cleaning.

Positioning

The colour of the timber alters over time with ageing and exposure to UV light. This can be reduced by minimising direct sunlight.

WARRANTY

A comprehensive statement of warranty is provided on our website.

Each Maark piece is hand-made by our craftspeople, therefore has natural variations. We aim to represent these characteristics throughout Maark's marketing collateral. These natural qualities have no impact on the performance of the product. We suggest obtaining material swatches or viewing the product in person to ensure it meets your expectations.
