# about us.

CRAFTED WITH  
CARE BY EYE  
AND HAND

## about us.

We create mood-boosting concrete bathroom products. We do this by merging traditional furniture craftsmanship with innovative concrete formulations.

## our inspiration.

Maark, is a philosophy that embodies traditional European values, hard work, and an unwavering commitment to providing high-quality bathware.

Inspired by our grandfather Markus, a Greek immigrant who established his family in Australia after World War II, his entrepreneurial spirit and strong work ethic served as a guiding light for his family and an inspiration for our business endeavours.

## mood boosting.

Maark strives to break away from mundane, uninspired, and mass-produced designs that dominate the industry. White ceramic products are just plain boring. We believe that bathroom products should be mood boosters, designed to provide you with something exceptional.

## real furniture craftsmanship.

Some time after taking over a traditional furniture-making business, we established the Maark brand. The company had been producing high-quality custom steel, timber and concrete furniture for several decades.

Our craftspeople now combine their skills in traditional timber and steel furniture making with advancements in architectural concrete. The result is a new range of European inspired bathroom furniture products.

Our production process is 100% local, and we continue to collaborate with skilled blacksmiths, artists and sculptors who share our dedication to preserving traditional manufacturing practices.

# our promise.

A SIMPLE 10-YEAR WARRANTY.

## research and development.

We have specially engineered our concrete basins for use in wet areas. They have been developed to be water tolerant and withstand thermal shock.

We stand behind all our bathroom products whether used for residential or commercial purposes.

withstand thermal shock

It's okay to judge people  
by their **colour** choice.

# colours to boost your mood.

Concrete is derived from a number of materials that are variable in nature. Due to the nature of concrete, variations in colour and surface texture will occur, making each piece unique. These are not defects, but rather part of the material's character.

## Concrete Characteristics

## Concrete Tones

## Earth Tones

## Contemporary Tones

### MATERIALS REPRESENTATION

Actual colour and material variations will appear different on screen. Although we aim to represent these characteristics through Maark's marketing collateral, we suggest obtaining material swatches or viewing in person to ensure it meets your expectations.

Washbasins / Countertop

# MK101 Basin

Material: Concrete  
Mount: Surface mount  
Other: Suits standard 32-40mm  
2-piece waste, no overflow  
Weight: 10kg

**Soft and round lines,  
basic geometry.**

With details from every angle, the MK101 concrete basin sits on top and reveals a magnetic presence full of sensory vibrations.

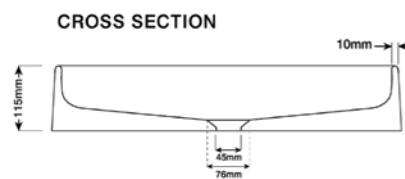

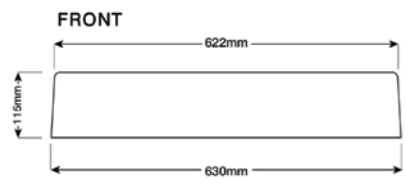

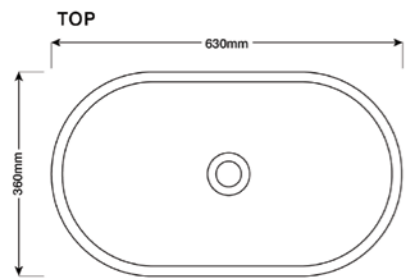

Washbasins / Countertop

# Capsule Basin

**Modest and simple, the essence of minimal design philosophy.**

With details from every angle, the Capsule concrete basin rests on top and has an oval shape with a high and rounded edge.

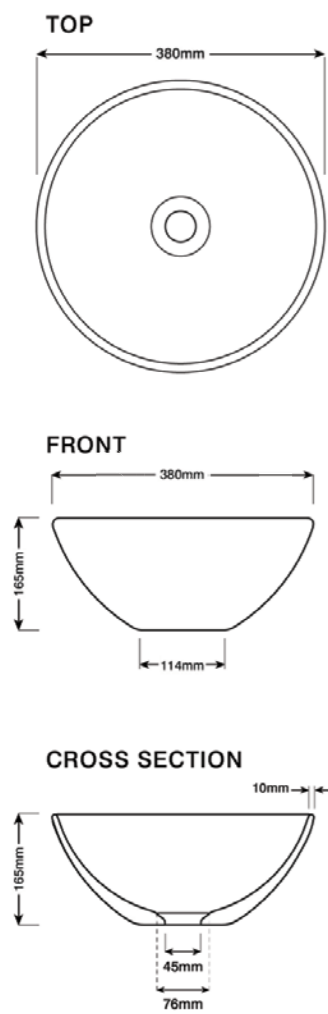

Material: Concrete  
Mount: Surface mount  
Other: Suits standard 32-40mm  
2-piece waste, no overflow  
Weight: 17kg

Washbasins / Countertop

# Bowl Basin

**A perfect bowl, clean and precise in form.**

A deep and enveloping form, the Bowl concrete basin's exterior exaggerates concrete's organic imperfections, leaving the exterior with bug holes while the interior is pleasantly smooth.

Material: Concrete  
Mount: Surface mount  
Other: Suits standard 32-40mm  
2-piece waste, no overflow  
Weight: 5.3kg

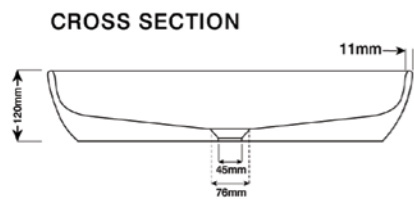

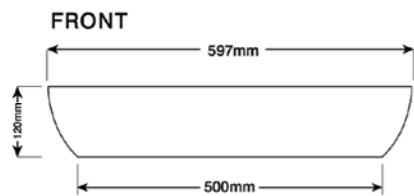

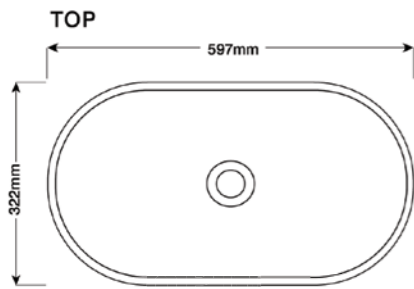

Washbasins / Countertop

# Noah Basin

**As sculptural as it is functional.**

The Noah concrete basin is a true vessel of beauty and makes a statement across all interior styles. The uneven nature of its top edge embraces the organic nature of this handcrafted piece.

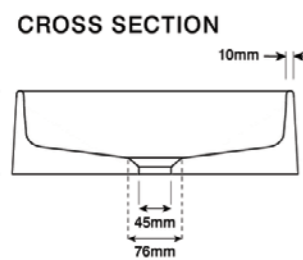

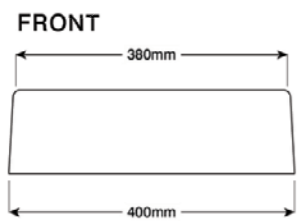

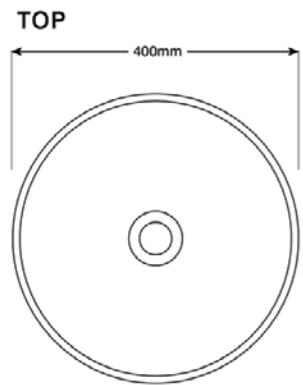

Material: Concrete  
Mount: Surface mount  
Other: Suits standard 32-40mm  
2-piece waste, no overflow  
Weight: 10kg

Washbasins / Wall Hung

# MK101 Wall Hung

Material: Concrete  
Mount: Wall hung, bracket included  
Other: Suits standard 32-40mm  
2-piece waste, no overflow  
Weight: 10kg

**Soft and rounded lines,  
basic geometry.**

With details from every angle, the MK101 wall hung concrete basin reveals a magnetic presence full of sensory vibrations. Mounting bracket included.

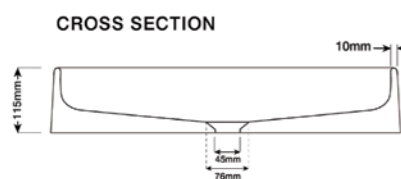

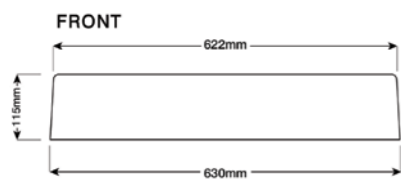

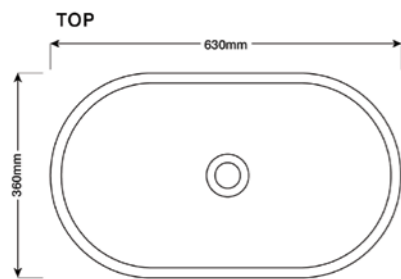

Washbasins / Wall Hung

# Capsule Wall Hung

**Modest and simple, the essence of minimal design philosophy.**

With details from every angle, the Capsule wall hung concrete basin comes with a mounting bracket to reveal its oval shape with a high and rounded edge.

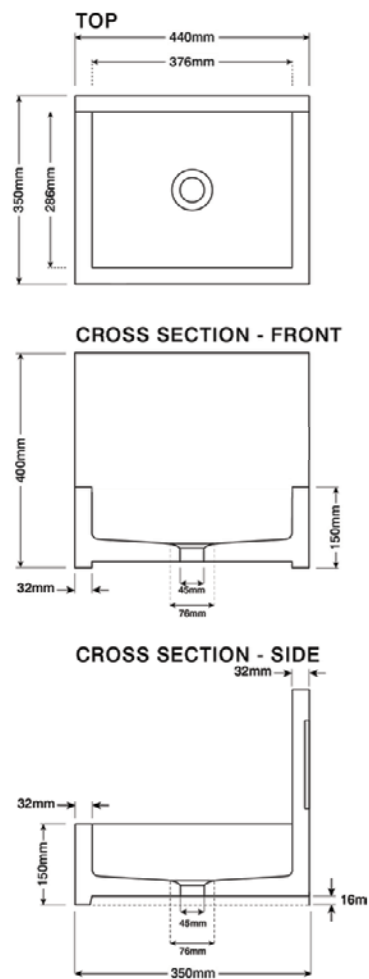

Material: Concrete  
Mount: Wall hung, bracket included  
Other: Suits standard 32-40mm  
2-piece waste, no overflow  
Weight: 17kg

Washbasins / Wall Hung

# Trough Wall Hung

Material: Concrete  
Mount: Wall hung, brackets included  
Other: Suits standard 32-40mm  
2-piece waste, no overflow  
Weight: 25kg

**A classic reborn, the ideal of simplicity and presence.**

A simple design that has adorned public spaces throughout southern Europe for centuries. This deep concrete sink has a wall-mounted fixture, tailor-made for powder rooms.

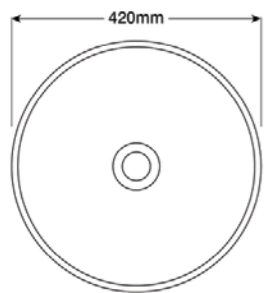

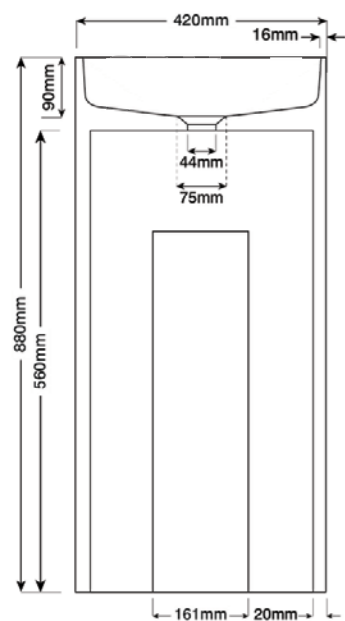

Washbasins / Freestanding

# Tondo Pedestal

TOP

CROSS SECTION

Material: Concrete  
Mount: Freestanding  
Other: Suits standard 32-40mm  
2-piece waste, no overflow  
Weight: 55kg

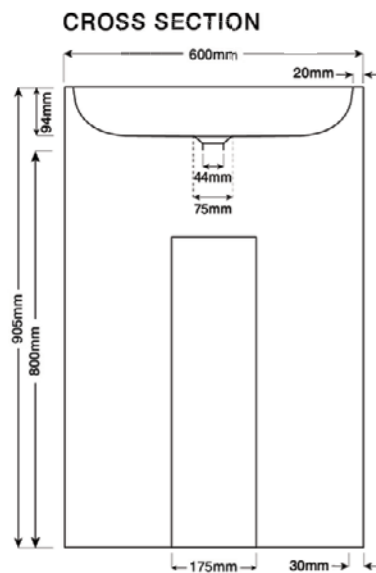

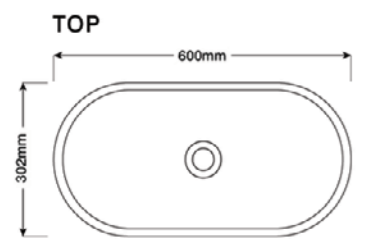

## Beyond ordinary.

The Tondo column concrete basins design delivers a wow-factor, serving as an exceptional centerpiece for any contemporary bathroom while eliminating the need for a traditional vanity. Its purposeful elegance as a pedestal basin fills the space with grace.

Washbasins / Freestanding

# Ovale Pedestal

Material: Concrete  
Mount: Freestanding  
Other: Suits standard 32-40mm  
2-piece waste, no overflow  
Weight: 73kg

**Dominating a space with its soft yet strong volume.**

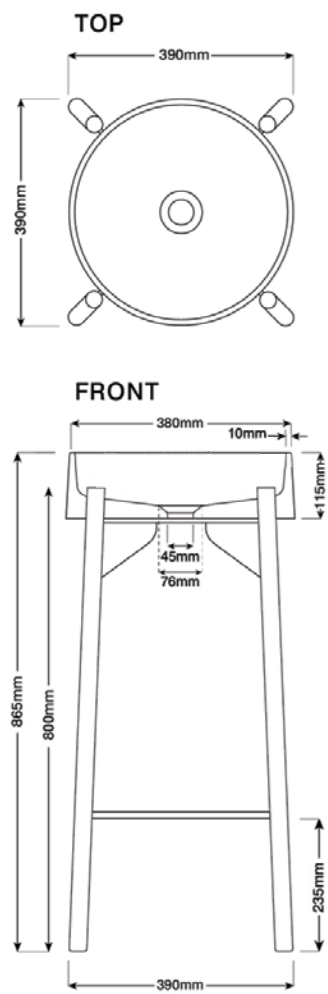

A sculptural design that creates a dynamic and harmonious effect to celebrate this pedestal basin's natural aesthetic of concrete.

Washbasins / Freestanding

# Fuse Console

Material: Concrete + Galvanised Steel  
Mount: Freestanding  
Other: Suits standard 32-40mm  
2-piece waste, no overflow  
Weight: 17.5kg

**Cubism design philosophy.  
Functional and artistic.**

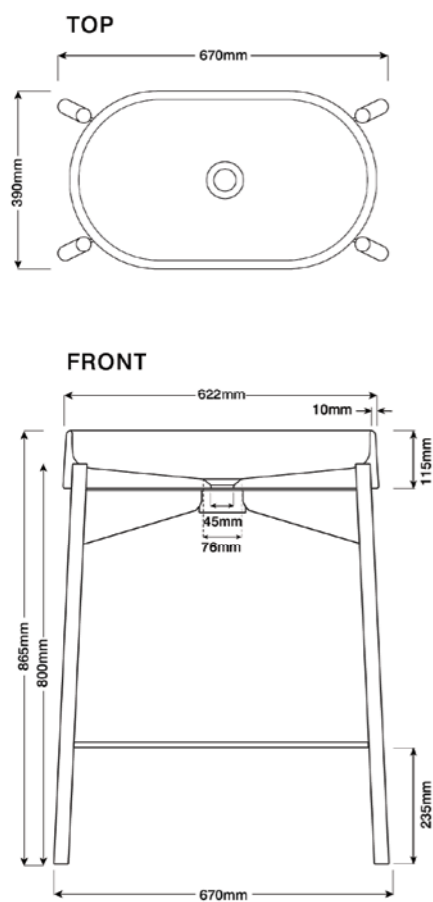

Crafted by our blacksmith, the Fuse is an exceptional piece that embodies the very essence of Cubism. An exquisite blend of artistry and functionality.

Washbasins / Freestanding

# Fuse XL Console

Material: Concrete + Galvanised Steel  
Mount: Freestanding  
Other: Suits standard 32-40mm  
2-piece waste, no overflow  
Weight: 26.6kg

**Cubism design philosophy.  
Acute angles within a  
quadrangular form.**

Crafted by our blacksmith, the Fuse XL is an exceptional piece that embodies the very essence of Cubism. An exquisite blend of artistry and functionality.
